*Final date for withdrawal from units without penalty

NYUNGAR SEASONS

December	January	February	March	April	May	June	July	August	September	October	November
Birak (first summer)		Bunuru (second summer)		Djeran (the autumn)		Makuru (first rains)		Djilba (second rains)		Kambarang (the flowering)	
Summer			Autumn			Winter			Spring		

International Year of Camelids

Camelids are a family of even-toed ungulates known for their distinctive physical characteristics. They include several species, the most well-known being alpacas, camels and llamas.

Camelids have played an integral role in various cultures for centuries, serving as pack animals, sources of wool and meat, and even companions. In 2024, the UN-declared Year of the Camelids, the world recognises these remarkable creatures and their invaluable contributions to humanity.

At Curtin Medical School, a team led by Dr Kylie Munyard has developed a genetic test to identify the sought-after 'classic grey' genetic colour pattern in an alpaca's coat, a discovery that's been commercialised globally and is making a real difference for alpaca breeders around the world. Dr Munyard is now developing tests that determine other camelid colour patterns.
